

# Temp&RH monitoring APP user manual

## V1.3

### Introduction

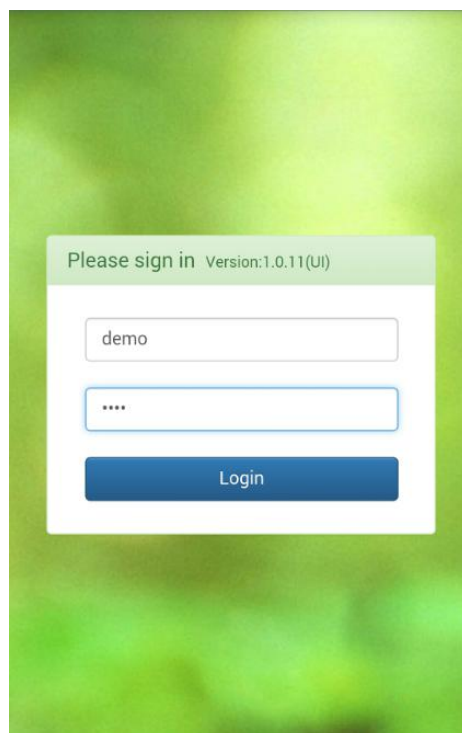

Welcome to using Tzone's devices and cloud real-time monitoring platform. In order to provide more great using experience, we developed this Android/IOS APP. So, you can use your phone to real-time monitor temperature and humidity when you away from the computer. With real-time temperature, humidity and location checking, 7/24 temperature and humidity alarm, history data download functions, it will be your great monitoring assistant.

#### User guide:

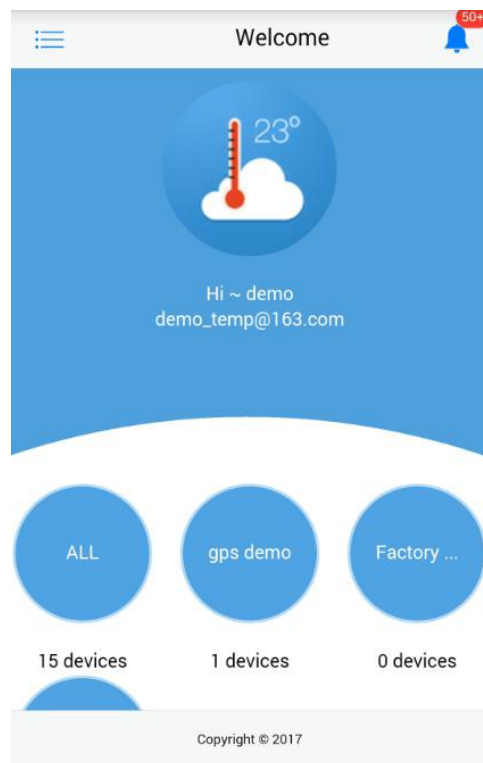

1. You can download this temperature and humidity monitoring APP on the link below:

[http://t.tzonedigital.cn/app/thmp\\_en-us.html](http://t.tzonedigital.cn/app/thmp_en-us.html)

2. After installed this APP, please log in it with your account(same account as yours in web platform):

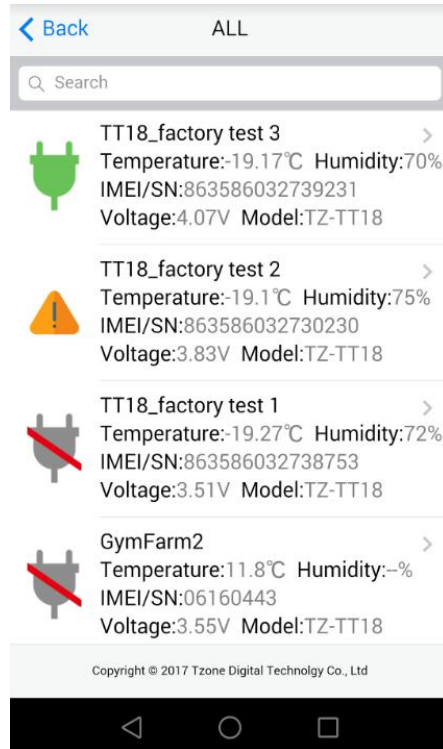

3. Then you can see the different monitoring groups in your account:

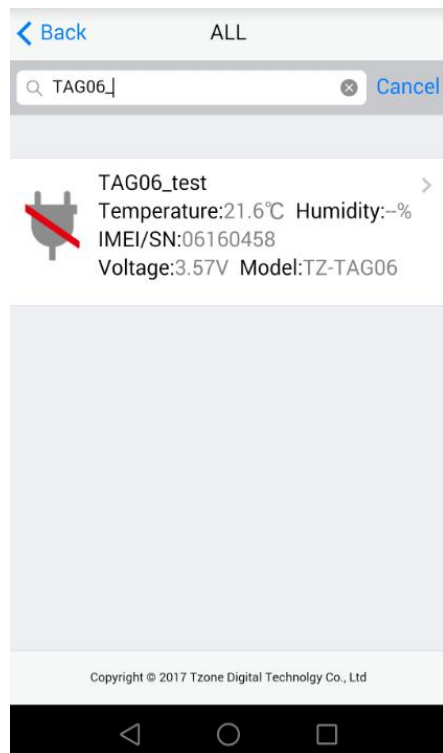

4. (1) choose a group as you like, you can see the list of devices. There will have four different icons means four different status.

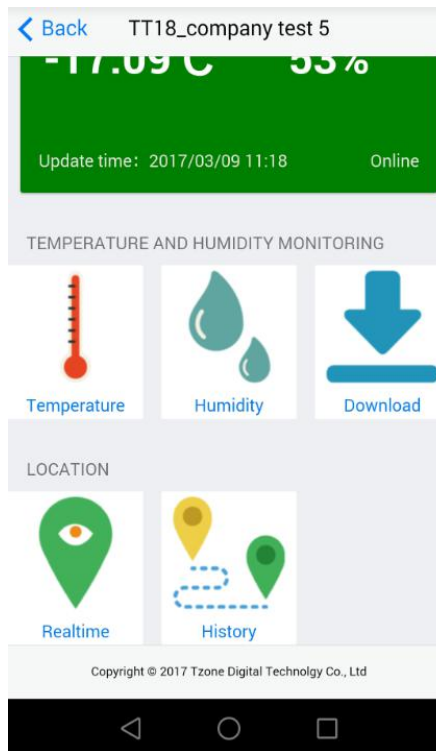

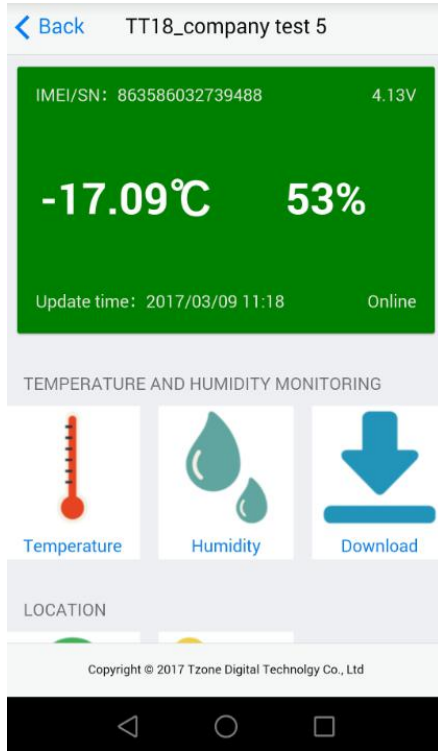

(2) You can type the device name in the blank to check the device :

(3) Click one of the device for the details:

Details: real-time temperature data and recorders、real-time humidity data and recorders、download option、real-time location、location history.
